Forecast for Wednesday 21 Jul 2021

Weather: Dry and warm through the early hours with clear skies allowing temperatures to rise quickly making it feel hot by the afternoon, especially on south facing slopes. Some cumulus cloud bubbling up by the afternoon but staying above all the summits. A small chance of an isolated shower, possibly with thunder developing during the afternoon. Otherwise, staying dry and clear into the evening and overnight period.

Chance of cloud free mountain/hill tops above 600m: 100%

Visibility: Very good with distant hills and landmarks easily visible from summits. A slight heat haze during the afternoon, with this reducing the air clarity a little.

Meteorologist's View

Another very warm day with very high UV levels which will give a high risk of sunburn, and the hot conditions will give a risk of dehydration and heat exhaustion. Remember sun protection and plenty of water if you are heading into the mountains.

Recent rainfall: measured at Neuadd: altitude 353m
